

WORK EXPERIENCES

SITE

Senior Front-End Engineer

Jan 2025 - Present

- Led internal community discussions on front-end technologies, fostering knowledge sharing and improving team alignment on best practices.
- Optimized the front-end development pipeline by expanding automation across build, testing, and deployment processes.
- Developed a cross-platform mobile application using Flutter, focusing on reusable components, responsive UI, and clean architecture. Gained practical experience with Dart, widget lifecycle, and modern state management techniques.
- Implemented a dynamic form builder system designed to be reused across multiple front-end projects. It supported various input types, validation rules, and conditional logic, improving development speed and consistency.

Software Engineer

Dec 2022- Jan 2025

- Developed pages, components, and tools for clients using React and AntDesign
- Represented front-end developers' opinions on project details
- Developed interactive dashboards using Apache Echarts to display insights from user data.
- Wrote end-to-end automated tests to ensure code quality during development.

Checkboard

Oct 2022-Dec 2022

Software Developer Intern | Misk London Internship Program

- Implemented bug fixes and enhancements to user dashboards and mobile apps.
- Tested web and mobile features, creating tickets for improvements.
- Reviewed production code to maintain quality standards.

EDUCATION

2018-2022

Bachelor of Science, Computer Science with a minor in Space, University of Colorado Boulder
Boulder, Colorado, USA
3.2 GPA, Dean's List Fall 2018, Fall 2021

SKILLS

Languages: TypeScript, JavaScript, Dart

Frameworks & Libraries: React, Ant Design, Flutter (entry level), ECharts

Tools: Camunda 7, Git

Practices: Agile methodologies, E2E Testing, UI/UX Design

PROJECTS

Request management system - front end

Developed a product that manages requests through complex workflows using Camunda 7. As well as displays several insights about the request and user behavior through interactive dashboards and charts. This product helped streamline a process that was previously managed by emails and excel sheets and is now fully contained within this service.

Updating and maintaining a mobile application

Worked with CU Boulder Psychology Department's [Correll lab](#) to update and gamify their CRD (Cross Racial Deficit) app. Our team streamlined deployment, wrote documentation, updated the UI, and gamified the app. [GitHub Repo](#)
